ABOUT US

We are **Buried In Bermuda**, an alt-rock band with an eclectic catalogue of original material. Songs that pack a punch with powerful vocals, killer riffs and unforgettable hooks, our tracks are guaranteed to get your attention, get you head banging or get you experiencing a deep sense of emotional thought.

Our ethos is to have hard hitting guitar and bass with meaningful and thought-provoking lyrics that are interpretive but always aim to captivate and include a message that hits home with the audience. We blend in various genres and influences such as metal, grunge, hard rock and indie rock but it's always unmistakably us and our sound... **Buried in Bermuda**.

Formed in 2021 after a drunken chat in a pub, it was started from the ground up with a tiny bucket list. After a long hiatus due to COVID-19, we came back armed with new original material and a desire to get out there and play gigs. After our debut gig at The Fleece (Bristol), that tiny bucket list continues to grow.

MUSIC, SHOWS AND REVIEWS

We're currently working on our debut EP which is due to release later this year with a single launch gig on the **5th May at The Louisiana, Bristol**. Our music platforms currently contain a couple of singles and a few demos that we're set to record again as part of the upcoming album. Please use the links or player below. A few of our tracks have also been included on several Spotify playlists.

Our latest single is '**Wolves**' along with '**Electric**' earlier this year (both produced by Dan Ross) are our latest tracks on music platforms. We believe these tracks are more reflective of the quality and style of our sound going forward.
